Future plans

What is OpenBMC

- Open Source implementation of BMC
- A Linux Foundation project
- A full function Linux distribution running in embedded SoC
 - U-boot
 - Linux kernel
 - Systemd
- Strong community
 - IBM, Google, Facebook, Intel, Yadro, Dell, ...
 - Inspur, Lenovo, Bytedance, ...

BMC Development

	Earlier projects	OpenBMC
Control of features		
Fast bug fixes		
Control of security updates		
Effort to develop		
Open Source Community Code Reviews		

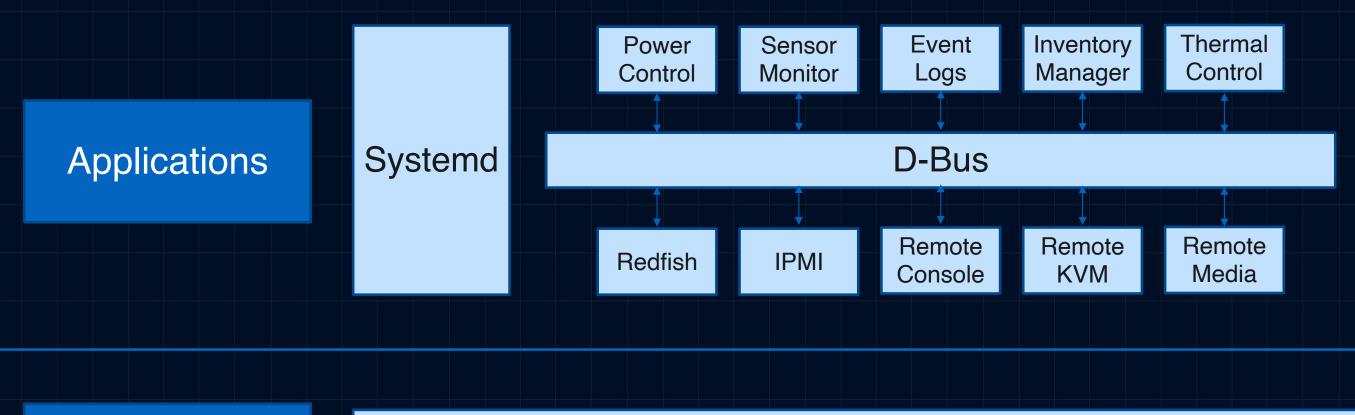

Modern Architecture

- Linux kernel 5.14.6
- Systemd 249 (249.4+)
- GCC 11.2.0
- C++20
- CI in QEMU master (6.0.50)
- Security patches always updated

OpenBMC Architecture

U-boot/Kernel

Linux Kernel

U-Boot

Hardware

SoC / SPI Flash

Industry Trends

- Facebook
 - FB OpenBMC already in production (different from upstream)
- Google
 - gbmc already in production (downstream changes)
- IBM
 - In production on P9 OpenPOWER servers
 - In development on P10 Enterprise servers

OpenBMC Introduction

Community Contribution

Future plans

Bytedance's path in OpenBMC

Practice

- Intel x86 specific
 - PECI, node-manager, etc
- Power
 - x86-power-control
- Sensors
 - entity-manager/dbus-sensors
 - virtual-sensor
 - static sensors from yaml
- FRU
 - Patched entity-manager for customized EEPROM layout

Practice

- SEL
 - phosphor-logging -> ipmid
 - Cached SEL for performance
- Fan
 - phosphor-pid-control
- code-update
 - phopsphor-bmc-code-mgmt
 - Plus patches for CPLD/FPGA, etc

Practice - CI

- openbmc-build-scripts
- Auto build with Gerrit
 - Development build by Push and MR
 - Sign and release build on Tag
- QEMU CI
- HW CI

Community

OpenBMC CCLA

Shared with me > OpenBMC Executed CLAs > ByteDance - **	
Name ↑	Owner
ByteDance Schedule A Update 2020-08-12.pdf 🚢	Kurt Taylor
Bytedance_OpenBMC_CCLA.pdf 🚢	Kurt Taylor

Community - OpenBMC

- <u>170+ patches</u>
- Various domains
 - meta-bytedance and meta-g220a
 - dbus-sensors, virtual-sensor
 - ipmid
 - code-update
 - networkd
 - webui
 - logging, SEL
 - build-scripts

Community - New features

- SEL from logging entry
 - Unified logging methods
- Cached SEL
 - Performance improvement
- 64MiB flash layout with new aspeed-sdk
- Virtual USB network
- IPv6 support in rsyslog
- Proxy support in CI

Community - QEMU

- g220a-bmc
- The first Bytedance's machine model in QEMU

```
# ./qemu-system-arm --version
QEMU emulator version 6.0.50 (v6.0.0-2786-gd4127349e3)
Copyright (c) 2003-2021 Fabrice Bellard and the QEMU Project developers
# ./qemu-system-arm -machine help | grep g220a
g220a-bmc Bytedance G220A BMC (ARM1176)
```

OpenBMC Introduction

Community Contribution

Future Plans

Future plans

- Performance improvement
 - Cached ipmi sensors
 - dbus-sensors optimization
- New features
 - Dual flash golden image
 - KVM screenshot
- New Hardware
 - AST2600
